Smarter calls. Better quality. Less busywork.

Four AI-powered tools that help agents, supervisors and quality teams deliver more in every interaction.

QA Engine

Kai Assistant

Note Generator

AutoSummary Notes

QA Engine

Every interaction evaluated, not just a sample.

QA Engine transcribes, analyzes and scores your voice and text interactions automatically, using your own rubric and quality standards.

- ✓ Complete visibility instead of random sampling
- ✓ Critical issues flagged the moment they happen
- ✓ Scores calibrated to your human auditors' criteria

Up to 100%

of interactions evaluated

28

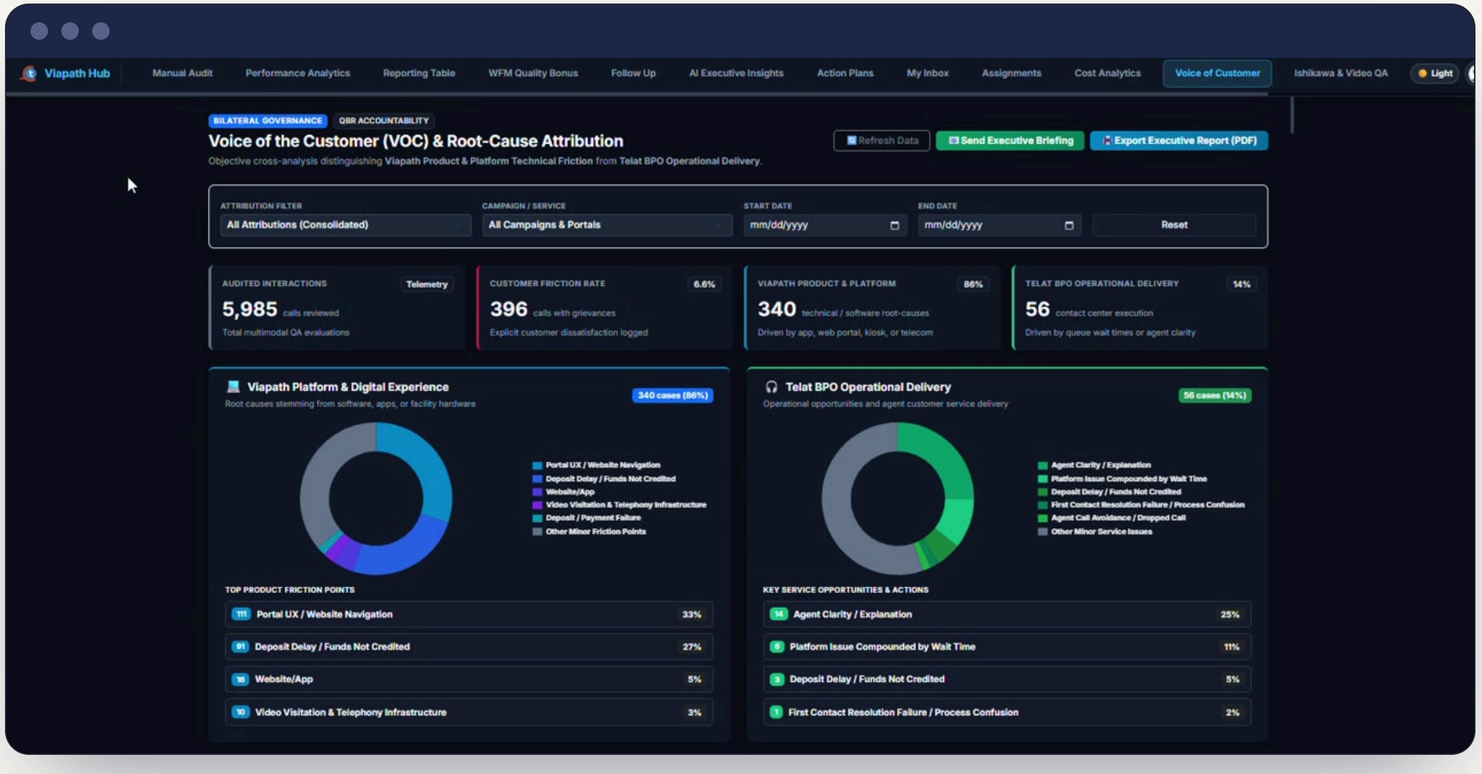

scorecard criteria checked on each call

Instant

detection of critical breaches

QA Engine · How it works

From recording to insight in one place.

1 **Transcribe & score**

Each call is analyzed for audio, soft skills and procedures.

2 **Track performance**

Dashboards show scores, pass rates and top gaps by site and campaign.

3 **Coach with AI insights**

Executive summaries point to where training matters most.

Kai · AI Assistant

The right answer, in seconds, while the customer is still on the line.

Kai is a real-time copilot for agents. It finds the official procedure instantly and turns complex questions into clear steps.

- ✓ Shorter handle times with direct, actionable answers
- ✓ Higher first-contact resolution through consistent procedures
- ✓ Answers grounded only in your approved knowledge base

0.0s

to find known procedures and manuals

1 click

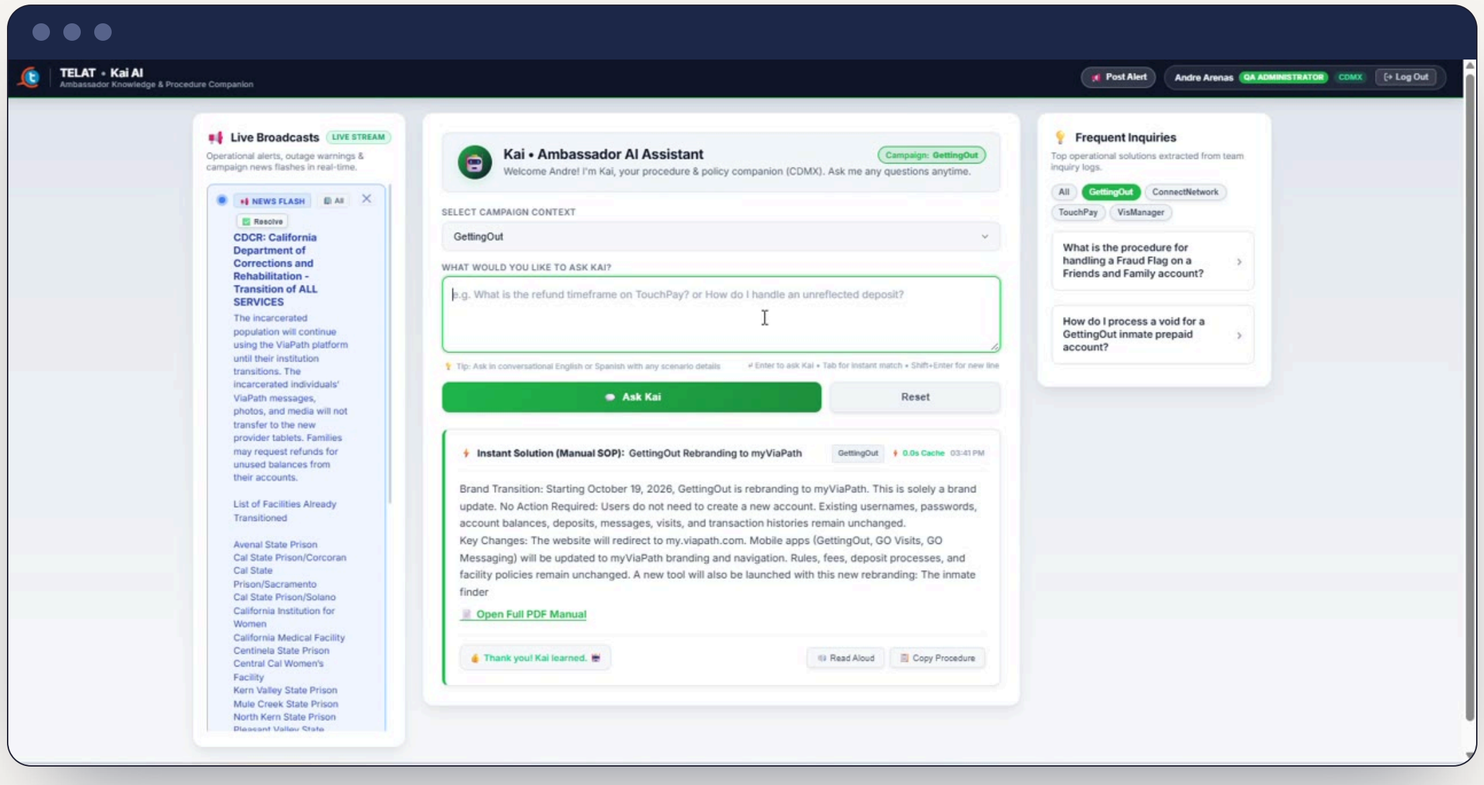

to switch campaigns mid-shift

Live

alerts from supervisors to every agent

Kai · How it works

Search as you type. Ask when it gets complex.

1 **Pick your campaign**

Agents see what they need without losing general policies.

2 **Type or ask**

Instant results while typing, or a full question for guided help.

3 **Follow the steps**

Diagnosis, numbered actions and what to say to the customer.

Note Generator

Every ticket in one live system.

Note Generator replaces scattered spreadsheets with a single place to create, assign and resolve tickets, with real-time visibility for the whole team.

- ✓ Faster assignment and resolution
- ✓ Validated forms that keep information clean
- ✓ One-click Excel reports and filters by campaign, type and status

1

unified system instead of separate files

72h

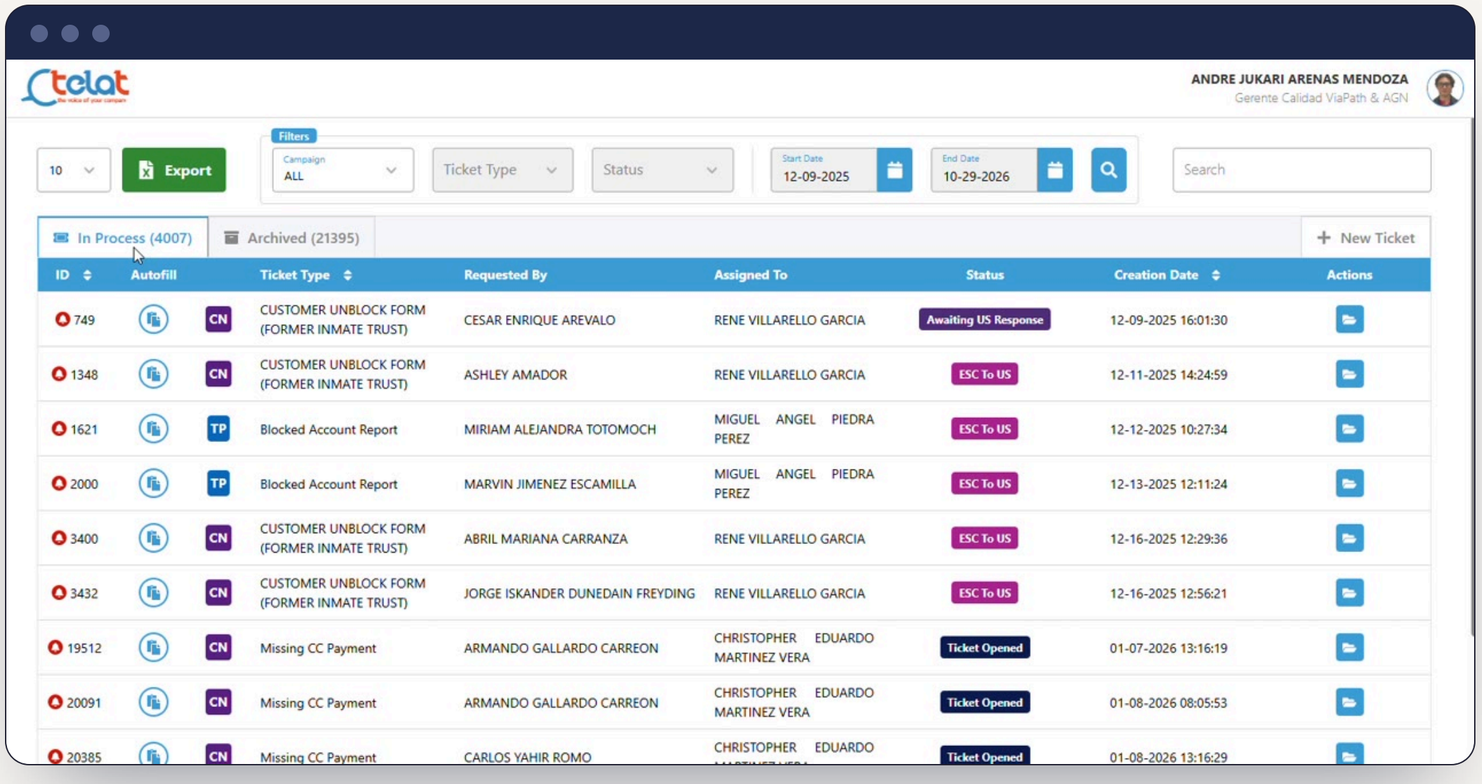

overdue alert highlights tickets in red

Real-time

view of every open ticket

Note Generator · How it works

Create, assign, resolve.

1 **Create the ticket**

Pre-built forms for each ticket type appear instantly on the dashboard.

2 **Assign an owner**

Supervisors pick the team member who will handle it.

3 **Close with a reason**

Final statuses require a note, so every case is documented.

AutoSummary Notes

Turn 90 seconds of post-call work into one click.

AutoSummary listens to the call live and writes a structured CRM note the moment the agent hangs up.

- ✓ Agents stay focused on the customer, not on typing
- ✓ Every note follows the same clear format
- ✓ Amounts, accounts and sentiment captured automatically

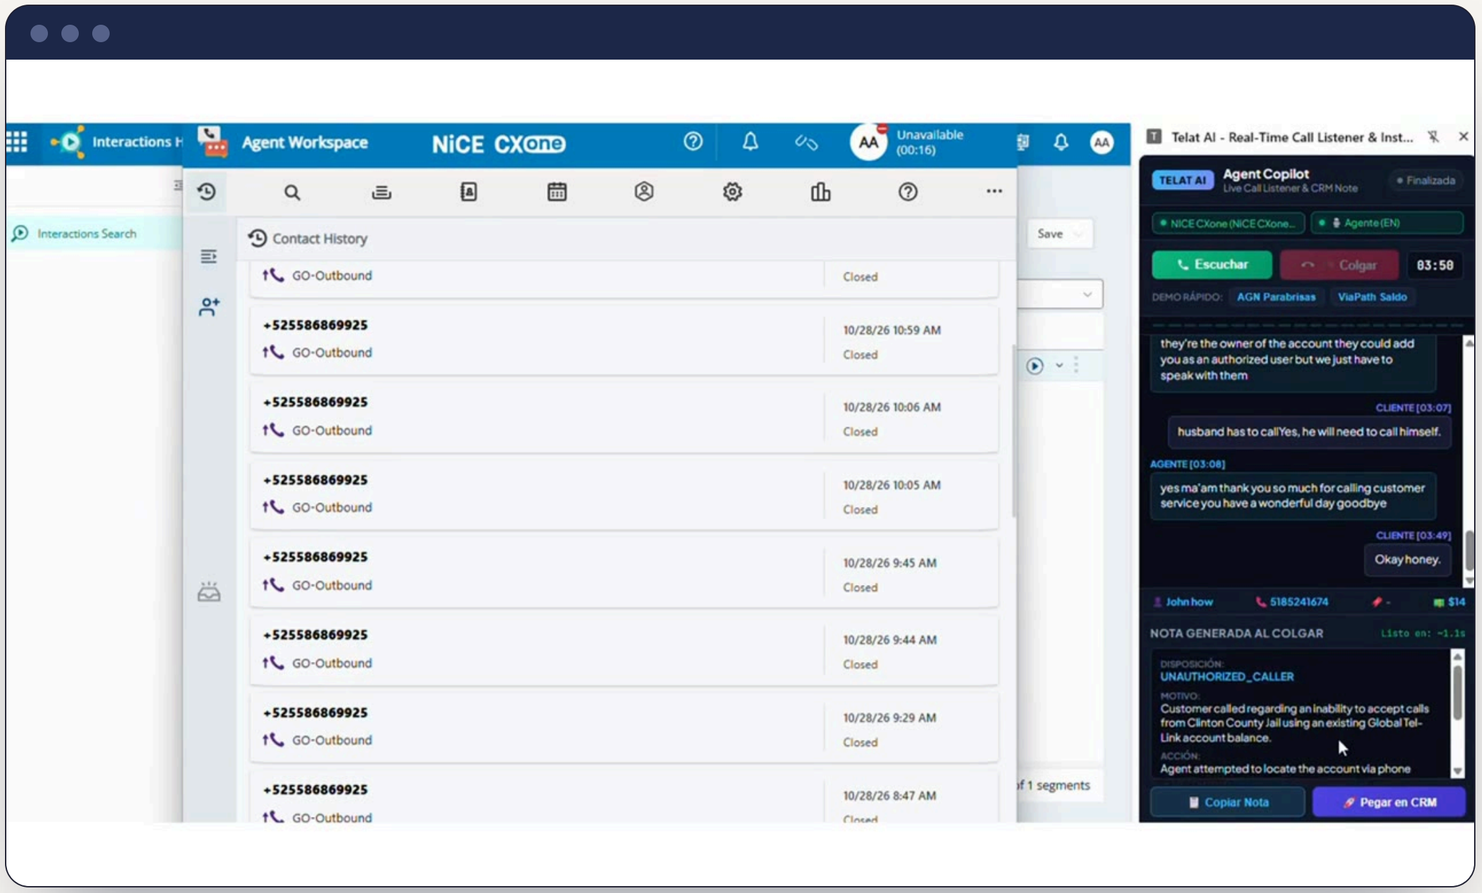

−78%
after-call work time

1.1s
to generate the note

+25%
extra handling capacity

AutoSummary Notes · How it works

Take the call. Review. Paste.

1 **Handle the call as usual**

No change to the agent's workflow or phone setup.

2 **Note appears at hang-up**

Reason, details, resolution and sentiment, already written.

3 **Paste into the CRM**

One click and the note is in the customer record. Sensitive data is masked.

Let’s bring this to your operation.

Better quality, faster answers and less manual work, from the first day.
