AI VIRTUALIZATION: SCALING EFFICIENCY FOR HIGH-VOLUME OPERATIONS

We help organizations transition from physical headcount dependency to an AI-virtualized hybrid ecosystem. We can virtualize your operational footprint—optimizing required human headcount by **50% or more**—and flexibly align capacity with campaign volume spikes and SLA demands.

PREVIOUS BASELINE

Traditional BPO Model [200+ Human Agents]

Previously, scaling campaign volume required expanding physical seat headcount—managing over 200 dedicated human agents on the floor to absorb peak transaction hours.

⚠ High seat overhead & long ramp-up cycles

TELAT AI MODEL

AI-Driven Virtualization [50%+ Headcount Optimization]

By embedding conversational AI, automated data verification, and smart routing, we virtualize routine interactions—reducing human agent requirements by 50% or more while maintaining 100% SLA throughput.

✓ Flexible workforce ratio tailored to campaign needs

Dynamic Campaign Ratios
Scale AI vs. Human mix on demand

100% SLA Protection
24/7 coverage during volume spikes

Overhead Reduction
Lower physical seat & training costs

STRATEGIC HUBS & NEARSHORE FOOTPRINT

Operating **4 strategic centers across North America** (3 in Mexico and 1 in the United States), providing seamless geographic redundancy, bilingual talent access, and BCP continuity certified under ISO 22301.

- **CDMX Roma Hub (Calle Monterrey 149)**
  Corporate headquarters, executive leadership, client governance, and advanced IT architecture.
- **CDMX Insurgentes Hub (Av. Insurgentes Sur 263)**
  High-density bilingual contact center floor, omnichannel training facilities, and QA center.
- **Ciudad Juárez Hub (Chihuahua)**
  Northern frontier operations hub, native bilingual border talent, and mission-critical 24/7 support.
- **El Paso Hub (Texas, USA)**
  U.S. sovereign entity gateway, cross-border redundancy, and high-security transactional processing.

ENGAGEMENT MODEL & EXECUTIVE ACTION PLAN

1 **Diagnostic & Process Profiling (Week 1)**
We analyze current call volumes, AHT patterns, manual review bottlenecks, and system integrations.

2 **AI Virtualization & Sandbox Setup (Weeks 2–3)**
Deploy customized AI copilots, OCR pipelines, and telephony routing configurations in a sandbox.

3 **Specialist Roster Alignment (Weeks 3–4)**
Onboard vetted bilingual specialists in our Roma or Ciudad Juárez facilities, calibrated with AI copilot training.

4 **Go-Live & Continuous Optimization (Day 30+)**
Full operational transition under SLA guarantees, 100% speech analytics quality auditing, and executive reporting.
