07 | QA DEMO WALKTHROUGH (3 MINUTES)

HOW AI-QA OPERATES IN REAL INTERACTIONS

Witness how our engine intercepts a customer dialogue in seconds, audits compliance against agreed scorecard policies, flags exact audio evidence, and produces supervisor coaching without human lag.

1. **Dialogue Ingestion & Live Transcription**
2. **Scorecard Policy Match & Anomaly Detection**
3. **Targeted Coaching Trigger for Floor Supervisor**

08 | FAST-TRACK PILOT APPROACH

LET'S BUILD YOUR NEARSHORE ADVANTAGE

Deploy a zero-friction, calibrated pilot before full contract commitment. Validate our talent, AI QA accuracy, and operational agility on your live workflows.

1. **Pilot Scope & Scorecard Calibration**
   Select one targeted workflow or interaction sample. Calibrate our AI scorecards directly against your existing internal QA rubrics.

2. **Dual-Track Human & AI Validation**
   Run parallel audits comparing AI findings with expert human reviews to calibrate model precision and fine-tune scorecards before operational scale-up.

3. **Commercial ROI & Ramp-Up Roadmap**
   Evaluate hard metrics: audit velocity, supervisor coaching effectiveness, resolution times, and total cost savings before expansion.

Typical pilot timeline: 14 to 30 days from initial discovery call.
