OPERATIONAL AI & B2B CX

YOUR CUSTOMERS DON'T CALL TO CHAT. THEY CALL TO RESOLVE.

We empower high-volume customer experience by seamlessly harmonizing artificial intelligence, automated governance, and end-to-end operational workflows.

OPERATIONAL REALITY

THE BOTTLENECK OF TRADITIONAL BPO

High attrition, scattered legacy tools, and blind-spot quality audits degrade customer satisfaction and drive up transaction costs.

Traditional call centers compensate for system inefficiencies by adding raw headcount. We replace operational friction with structured automation and intelligent copilots.

High Floor Attrition & Knowledge Drain

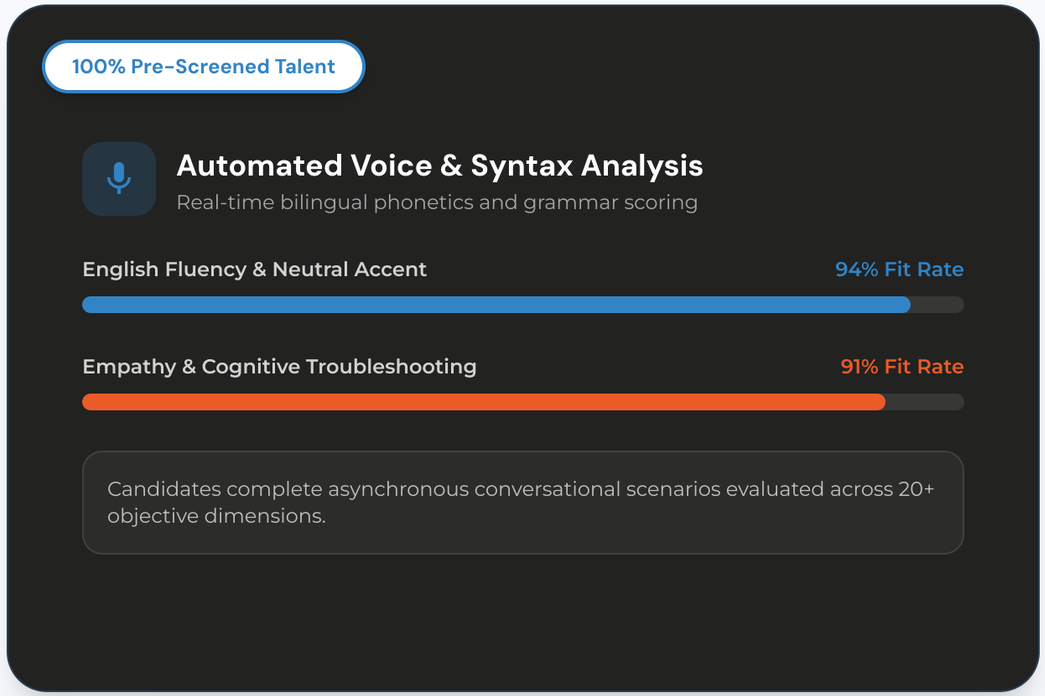

Complex procedures and post-call administrative burdens burn out agents, creating continuous re-training cycles and erratic service quality.

Prolonged Hold Times & Slow Wrap-Up

Agents toggle between disconnected windows to locate policies, inflating average handle times (AHT) and forcing long hold queues.

2% Manual Sampling Blind Spots

Conventional QA audits evaluate only 1 to 2 interactions per agent each week, leaving 98% of calls completely unmonitored for regulatory compliance.

TALENT ACQUISITION

PREDICTIVE HIRING & SKILLS VERIFICATION

We deploy automated talent vetting to evaluate language fluency, typing navigation speed, emotional resilience, and active problem solving before candidates reach training.

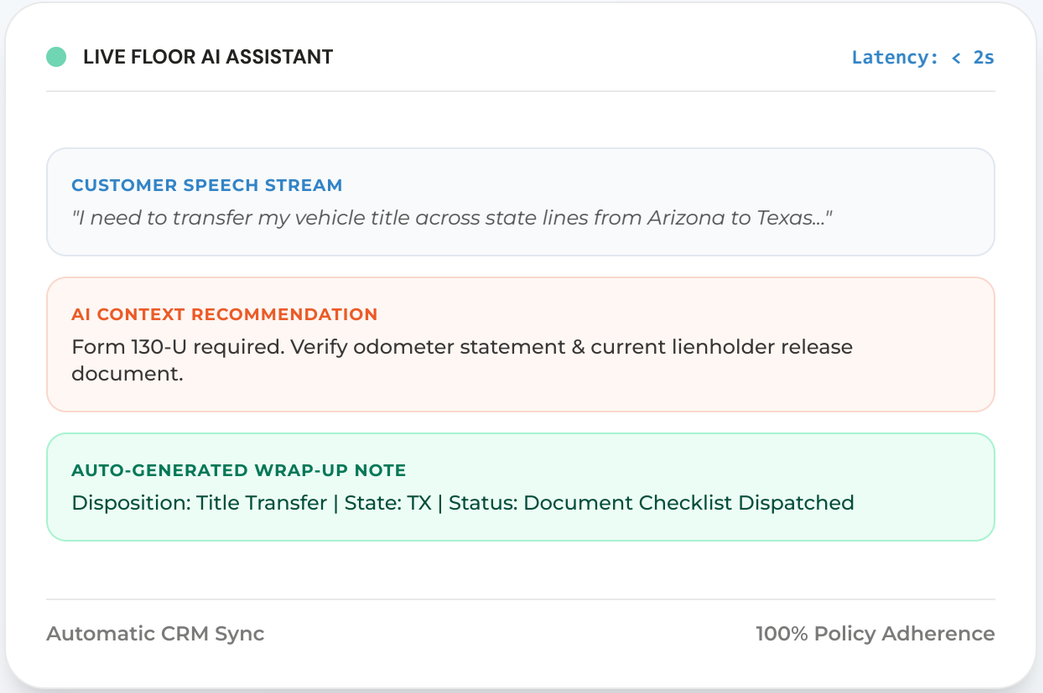

- **85%+ 90-day retention rate across operational teams.**
- **Zero classroom attrition via realistic day-in-the-life simulations.**
- **Bilingual talent pool curated across 4 North American hubs.**

LIVE FLOOR AUGMENTATION

REAL-TIME COPILOT & AUTOMATED TICKETING

Our AI Copilot listens in real time, surfaces policy answers within 2 seconds, and auto-generates structured case notes and CRM dispositions immediately upon call wrap-up.

- **AHT reduced from 8 minutes to 3.5 minutes on complex calls.**
- **Under 15s wrap-up with 100% complete CRM field population.**
- **Dynamic knowledge base updates propagated to all agents instantly.**

CONTINUOUS COMPLIANCE

100% SPEECH ANALYTICS & OBJECTIVE QA AUDITING

We audit every single customer conversation using natural language processing. Sensitive data masking, disclosure verification, and customer sentiment scores are updated continuously.

- **Complete operational visibility replacing subjective spot checks.**
- **Critical compliance breaches flagged the moment they occur.**
- **Automated coaching cards ready for supervisor 1-on-1 coaching sessions.**

WHO IS TELAT

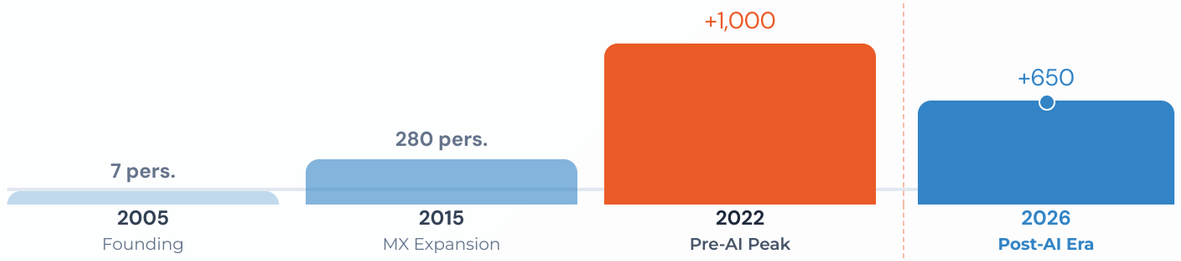

TECHNOLOGY APPLIED TO CUSTOMER EXPERIENCE

Over 20 years leading binational customer experience and applied artificial intelligence across Mexico and the USA (2005 - 2026).

We are not a conventional contact center. We are a technological and operational partner powering excellence for leading North American brands.

HUMAN TALENT EVOLUTION

2005 – 2026

Operational Hubs Map

BINATIONAL US / MX

- **CDMX (Roma):** Corporate & Operations
- **Cd. Juárez:** Mission-Critical Frontier Support
- **El Paso, TX:** Bilingual Nearshore Hub (USA)

Human talent optimization via AI: Operation calibrated to 650+ high-performance specialists.

INSTITUTIONAL GOVERNANCE & SECURITY

COMPREHENSIVE SECURITY & AUDITED CERTIFICATIONS

Telat Group operates under audited international management systems, regulatory compliance frameworks, and institutional recognitions, ensuring comprehensive legal, technical, and operational shielding.

ISO 9001:2015
QUALITY MANAGEMENT SYSTEM

Audited quality standards, consistent service delivery, and continuous improvement.

ISO 18295-1:2017
CONTACT CENTRE REQUIREMENTS

International benchmark dedicated specifically to contact centres, agent welfare, and KPIs.

Modelo Global CIC v3.0
INTERACTION CENTER EXCELLENCE

Rigorous accreditation in customer relationship management and operational execution.

ISO/IEC 27001:2022
INFORMATION SECURITY (ISMS)

Robust cybersecurity, data privacy, access controls, and protection of confidential enterprise data.

PCI-DSS v4.0
PAYMENT CARD DATA SECURITY

Strict access controls, encrypted channels, and zero retention of sensitive cardholder data.

ISO/IEC 20000-1:2018
IT SERVICE MANAGEMENT

ITIL-aligned infrastructure governance, Tier-1/2/3 technical service desks, and incident tracking.

ISO 22301:2019
BUSINESS CONTINUITY (BCMS)

Resilient disaster recovery and failover redundancy between CDMX, Ciudad Juárez, and El Paso.

ISO 37001:2016
ANTI-BRIBERY MANAGEMENT

Uncompromising corporate ethics, legal compliance, and zero-tolerance anti-corruption protocols.

Distintivo ESR 2026
CORPORATE SOCIAL RESPONSIBILITY

Recognized fair-wage employment, agent wellness, diversity, and community sustainability.

DEPLOYMENT METHODOLOGY

FROM DISCOVERY TO HIGH PERFORMANCE

01

Operational Audit

We analyze transaction histories, call arrival curves, CRM bottlenecks, and compliance checkpoints.

WEEKS 1 – 2

02

AI Copilot Calibration

We ingest knowledge repositories, configure speech models, and calibrate automated CRM fields.

WEEKS 3 – 4

03

Talent Onboarding

Selected specialists undergo scenario simulations, tool mastery, and policy certification.

WEEKS 4 – 5

04

Go-Live & QA Scaling

Full volume cutover backed by real-time speech analytics, daily scorecards, and executive reporting.

DAY 30+ ONGOING

NEXT STEPS

LET'S REDESIGN YOUR OPERATIONS TODAY.

Deploy a calibrated nearshore operation backed by proprietary AI floor copilots, automated CRM documentation, and comprehensive quality auditing across our binational hubs.

Fast Diagnostic Review

We review your transaction curves and staffing requirements to formulate a high-efficiency nearshore deployment proposal.
