WHERE U.S. AUTO GLASS CHAINS BLEED MARGIN

Stop losing work orders to passive quotes & mis-triaged glass.

When store managers answer phones while prepping glass, two things break: price-check calls abandon to regional competitors, and hurried intake sends mobile vans out with the wrong NAGS part or missing ADAS calibration.

Lost Calls

Weekend & rush hour calls go unpicked while techs work inside repair bays.

Price Hesitation

Reps read cash quotes like robots instead of comparing comprehensive deductibles.

Wasted Truck Rolls

Wrong rain sensors, HUD glass, or ADAS brackets cause dry runs and cancellations.

AUDITED 3RD PLACE NATIONAL CX EXCELLENCE AWARD (2025) IMT / CX GLOBAL

Centralized intake restructuring for a **200+ location multi-state U.S. auto glass chain**, doubling conversion and scaling technician scheduling capacity.

VERIFIED INTAKE BENCHMARKS (DIRECT A/B PRODUCTION VS. U.S. FLOOR)

OMEGA EDI & POS TELEPHONY

SALES YIELD OUTPERFORMANCE

+30.2%

Higher Closed Work Orders

Bilingual specialists closed 30.2% more scheduled orders than the client's domestic U.S. in-house team on identical queues.

CONVERSION ACCELERATION

68.3%

Peak Quote-to-Work-Order

Trained to resolve deductible hesitations: lifted conversion from **33.9% baseline to 57.5% sustained and 68.3% peak**.

MOBILE ROUTE INTEGRITY

99.6%

NAGS & ADAS Lookup Accuracy

Accurate 17-digit VIN decoding eliminated dry runs, dropping job delay cancellations from **12.0% down to 1.5%**.

PEAK QUEUE GOVERNANCE

>50%

Abandonment Baseline Cut

Absorbed morning insurance FNOL surges and added **Sunday coverage**, stabilizing lost calls below **3.5%**.

Enterprise Scalability: 4 Sites (2 CDMX, Juárez & El Paso TX) · +650 Specialists · 24/7/365

9 Audited ISO / PCI Standards

AGNOSTIC INTEGRATION · OMEGA EDI, CCC ONE, GLASPACLX, MAINSTREET OR PROPRIETARY POS

How the intake engine converts calls without shop friction.

01 **Centralized Inbound & Sunday Queue Capture** — Sub-3.5% Abandonment

Calls bypass shop counters completely. Techs stay focused on windshield installs while our pods answer within 15 seconds, absorbing morning FNOL surges and weekend leads.

02 **17-Digit VIN & ADAS Recalibration Triage** — 99.6% NAGS Match

Real-time decoding detects rain sensors, acoustic interlayers, HUD, and forward cameras. Bundles static/dynamic recalibration immediately ($350–$600 margin protected).

03 **Objection Clearing & Deductible vs. Cash Comparison** — 68.3% Peak Conversion

Trained booking specialists compare $100 glass deductibles against out-of-pocket cash quotes, clear aftermarket hesitation, and collect deposits or 3-way conference TPA claims.

04 **Work Order Booking & Clean Dispatch Confirmation** — 96.8% 24-48h Dispatch

Slots shop bay drops or routes mobile vans with verified inventory, pushing confirmed work orders directly into your POS under audited PCI-DSS v4.0 tokenization.

30-DAY HEAD-TO-HEAD PILOT

ZERO RISK VALIDATION

Carve out a slice of overflow, Sunday traffic, or a regional cluster. We integrate via VDI / VPN into your POS within **14 to 30 days**. If our Quote-to-Work-Order conversion does not beat your internal benchmark, walk away with zero penalty.
