OPERATIONAL AI & B2B CX

YOUR CUSTOMERS DON'T CALL TO CHAT. THEY CALL TO RESOLVE.

We power customer experience by harmonizing artificial intelligence, automated governance, and end-to-end operational workflows.

⚠ OPERATIONAL REALITY

THE BOTTLENECK OF TRADITIONAL BPO

High attrition, scattered legacy tools, and blind-spot quality audits degrade customer satisfaction and drive up per-interaction costs.

Traditional call centers compensate for system inefficiencies by adding raw headcount. We replace operational friction with structured automation.

High Floor Attrition & Knowledge Drain

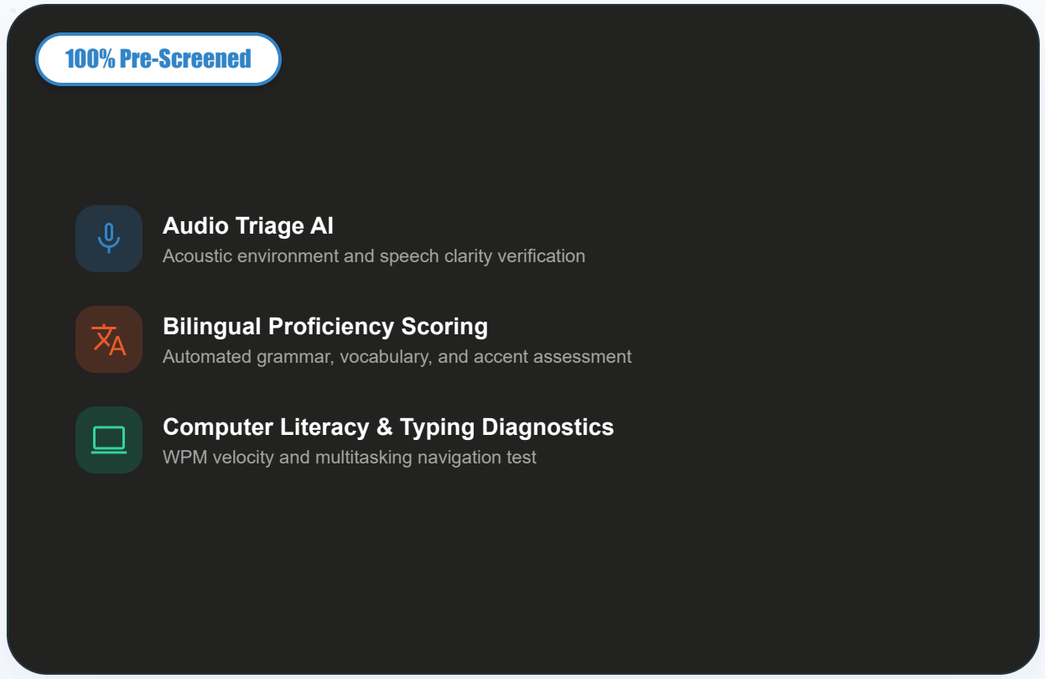

Complex procedures and high post-call administrative burdens burn out agents, creating continuous re-training cycles and erratic service quality.

Prolonged Hold Times & Slow Wrap-Up

Agents toggle between multiple disconnected windows to locate policies, inflating average handle times and forcing long hold queues.

2% Manual Sampling Blind Spots

Conventional QA audits evaluate only 1 to 2 interactions per agent each week, leaving 98% of calls completely unmonitored for compliance.

TALENT ENGINEERING

TALENT EVALUATION & AI RECRUITING

We filter and validate candidate competencies before onboarding. Our multi-stage AI triage analyzes voice modulation, English fluency, and technical agility to guarantee floor fit.

LIVE FLOOR COPILOT

REAL-TIME AGENT ASSISTANCE (AI COPILOT - KAI)

Kai is a real-time copilot for floor agents. It retrieves approved procedures in seconds, detects customer intent, and converts complex rules into direct step-by-step guidance.

- Shorter handle times with immediate, policy-grounded answers.
- Higher first-contact resolution through consistent procedures.
- Live supervisor broadcasts and priority alerts sent to all active agents.

CONTINUOUS QUALITY GOVERNANCE

INTELLIGENT QA AUDITING & 100% COVERAGE

QA Engine transcribes, analyzes, and scores interactions automatically against your custom scorecard. Every finding is linked directly to millisecond audio evidence for objective supervisor coaching.

- Complete operational visibility replacing random sampling.
- Critical compliance issues flagged the moment they occur.
- Automated coaching cards ready for supervisor 1-on-1 sessions.

STRUCTURED RAMP-UP

OUR ROADMAP TO OPERATIONAL EFFICIENCY

A disciplined 4-stage implementation framework ensuring zero disruption during onboarding, integration, and operational scaling.

01. Discovery & Scope

Process Mapping & Calibration

Detailed analysis of interaction volume, SLA targets, and client scorecard customization.

02. Integration & AI Setup

Tooling & Knowledge Base

InContact telephony configuration, CRM connector linking, and Kai AI agent copilot loading.

03. Certified Ramp-Up

Floor Deployment & Nesting

Sourced talent passing 360-degree screening, intensive curriculum, and supervised nesting.

04. Continuous Optimization

100% QA & Business Reviews

Automated speech-to-text auditing, interval adherence management, and executive business reviews.

NEXT STEPS

LET'S REDESIGN YOUR OPERATIONS TODAY.

Deploy a calibrated nearshore operation backed by proprietary AI floor copilots, automated CRM documentation, and comprehensive quality auditing.
